

0607 AWG Multiplexer

G2102-S

200 GHz L-band 40 CH Thermal/Athermal AWG

The Athermal AWG (AAWG) have equivalent performance to standard Thermal AWG (TAWG) but require no electrical power for stabilization. They can be used as direct replacements for Thin Film Filters (filter type DWDM module) for cases where no power is available, and are suitable for outdoor applications over -30 to +70 degree in access networks. WDM's Athermal AWG (AAWG) provide excellent optical performance, high reliability, ease of fiber handling and power saving solution in a compact package.
