Optical test and Measurement System
AQ8201 Series

High-speed, high accuracy measurement of WDM optical device specifications

General

The configuration of measurement systems for evaluation is a major issue in the volume production of optical devices for WDM. The optical Test and Measurement System AQ8201 Series has a wide lineup of modules to meet diverse needs quickly. The 19-inch rack design makes space-efficient, flexible system configuration possible. And it's also effective for specification evaluation of WDM-related parts such as MUX/DEMUX, AWG and EDFA.

Features

- General optical measurement equipment consists of the mainframe and display, and plug-in modules.
- Applies mainframe for 19-inch rack.
- Highly-visible 6.5-inch TFT color LCD
- Wide variety of module lineup
- 1 frame can mount up to 10 modules and save space.
- Support for LabVIEW driver.

①AQ8201-02 displays information for 1 frame (10 slots) simultaneously.

②Operating slots and modules can be identified by LEDs.

③Rotary knob (AQ8201-02) and operation switches designed for simple adjustment and operation of mounted modules.

Display screen

Displays set-up and measurement results for modules slot by slot.

④The function key menu for selected module.

- MWA module

⑤Optical spectrum display

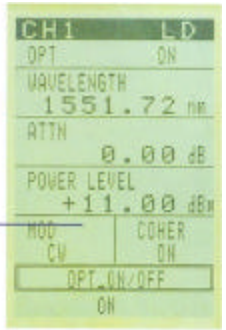
⑥The overall results for analysis data (peak wavelength, wavelength spacing, peak level, SNR, etc.).

- DFB-LD, ECL module

⑦Optical output on/off, wavelength and attenuation settings.

- OPM module

⑧Optical power, wavelength, and range settings.



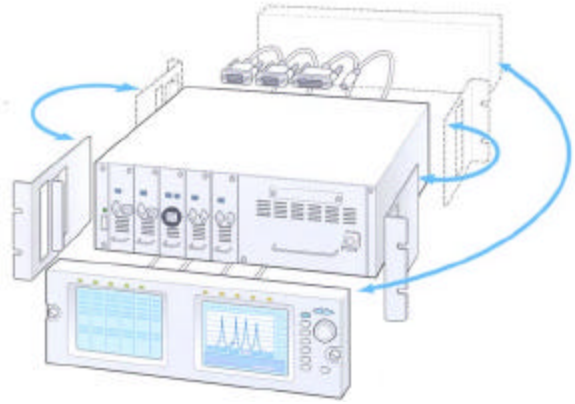
- ATTN module

⑨Attenuation and wave length shutter on/off settings

- Display Controller module

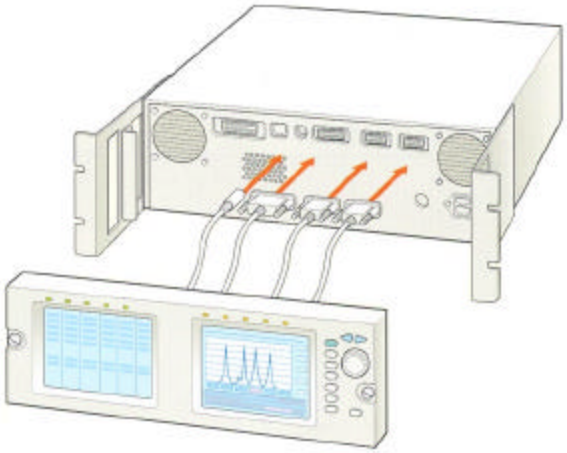
⑩AQ8201-03 displays detailed contents of selected 1 module only.

Easy to mount



(Display controller front mounted.)

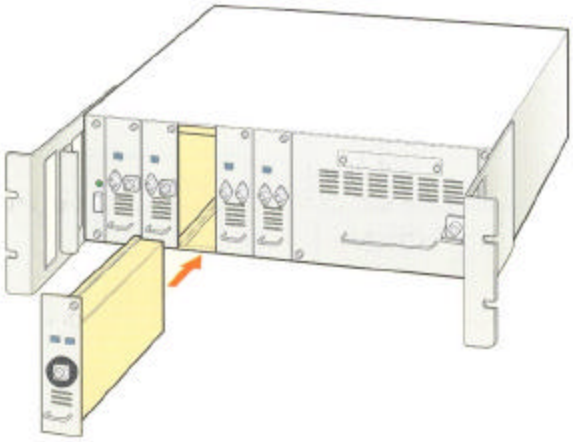
⊙Display controller can be attached to either front or back. (Requires extension cord when attached to front.)



(Display controller attached to back.)

⊙Display controller is used for monitoring and set-up of modules in the main frame.

⊙When an MWA module (optical spectrum analyzer) is mounted on the main frame, one display screen is used exclusively for the MWA module.



⊙As illustrated at left, the structure is so simple that you can easily mount/dismount modules.
